¹ Outline

Creating the Online Reference Database and the Interactive Functions for the book titled << Phono Sapiens Economics : The New 'Human-Centered Digital Economy >>

- The book was published in Korean in this September (paper and e-book) and will be e-book published in English in January 2020.
- Team members' names will be listed in the 'Acknowledgements.'

[In Korean bookstores]

2 Reference List & Search

The data set was manually and tediously created by the author and then an web page with multiple search categories are coded!

[Work Flow]

Data Set Excel (213 Records) Converting to Jason

Coding! (HTML, CSS, D3.js, and Java Script) Tada!

Import data from JSON file into app.js using d3.json().then

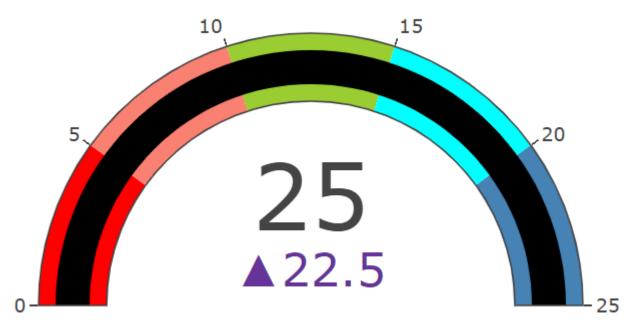

Collect the consultant name selection using element.property('value')

Filter the data using that consultant name, and create lists of unique parts, chapters, etc. using if(list.includes(item)) statements

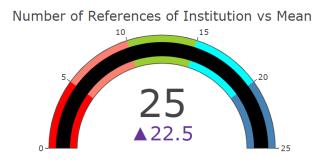

Print data to the info box by iterating through those lists

Displaying gauge info using dropdown menu

Number of References of Institution vs Mean

Overview of Steps

Import data from JSON file into app.js using d3.json().then

Collect the consultant name selection using element.property('value')

Filter the data using that consultant name, and collect the number of times that consultant name was referenced

Feed that reference count amount into plotly using mode: mode: 'gauge+number +delta'
